Interview Summary

Paper No. 17.

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant asked if "overexpressing" was being interpreted to mean both an increase in enzyme activity and transformation with a gene encoding the enzyme, and was told that was the case. It was suggested that claim 60 be amended to make the method step be one of transforming a plant with a nucleic acid encoding a SAT and that in the response to the Final Rejection Applicant should argue why Applicant thinks Saito et al does not suggest said transformation. .
